

Hello Year 1

Our Summer Term Science Topic is going to be all about **Plants and Growing.**

Your task this week is to go out into your garden or the park (with an adult) and look for as many different plants and trees as you can find.

Draw and label as many as you can and colour them in too! Ask your adult to help you name them

While you're out look for signs of Springtime too. You could add trees in blossom to your picture.
