

Using latitude and longitude - Answer Sheet

- Label the Prime Meridian on your map.
- Make a list of the continents that the Prime Meridian runs through. **Europe, Africa and Antarctica**
- Complete the unfinished numbering of the lines of longitude: add 60, 120 and 180 degrees east and west.
- Fill in the latitude and longitude information needed to locate numbers 1-10 on the map, in the grid below:

Number on the map	Latitude (degrees N or S)	Longitude (degrees E or W)	Continent or ocean?
1	0°N	40°E	Africa
2	60°N	30°E	Europe
3	20°S	120°E	Oceania
4	80°S	120°E	Antarctica
5	40°S	150°W	Pacific Ocean
6	40°N	0°E	Europe
7	20°S	90°E	Indian Ocean
8	0°N	60°W	South America
9	40°N	90°E	Asia
10	40°N	90°W	North America
11	60°S	30°W	Atlantic/Southern Ocean
12	60°N	150°E	Asia
13	20°N	0°E	Africa
14	60°N	90°W	North America
15	80°N	60°E	Arctic Ocean
