

# Using latitude and longitude

- Label the Prime Meridian on your map.
- Make a list of the continents that the Prime Meridian runs through. \_\_\_\_\_
- Complete the unfinished numbering of the lines of longitude: add 60, 120 and 180 degrees east and west.
- Fill in the latitude and longitude information needed to locate numbers 1-15 on the map, in the grid below:

Number on the map	Latitude (degrees N or S)	Longitude (degrees E or W)	Continent or ocean?
1	0°N	40°E	Africa
